

To the FCC

Ref: proceeding: 17-108

I fully and holy support Title 2.oversight of ISPs.

I also support Net Neutrality as well as I support Title 2 oversight ISPs and Net Neutrality!

I am requesting you keep the net free, this is the only place a persons like myself can check and research information in order to make sound balanced intelligent decisions.

Todays mainstream media/television has been leaning more and more to there sponsors and corporate / executives opinions while continuing to mislead Americans by pushing there own agendas all the while putting there views out as if they are fact with no regard for the American people or there/our safety.

I rely on the internet to keep in contact with my public officials as well community groups, my dockers plus so much more.

I truly believe that if you restrict the internet you will in fact limit educational growth and free exchange (freedom of speech) of thoughts witch would place so many of our citizens at a huge disadvantage while allowing company to choose who gets good/ fastest service and how dose not this is classism because it will hurt the poor,elderly as well as those in the most rural areas.
